

Calculating Family Expenses using Service Now

Team ID: NM2025TMID19382

Team Size: 4

Team Leader: SHYAMALA DEVI R

Team member: SIVASANGEETHA D

Team member: SOMNATH M S

Team member: SOWMIYA N

PROBLEM STATEMENT:

- Managing household finances is essential for every family to ensure financial stability and better planning. This project aims to develop a simple and efficient system using ServiceNow to record, track, and calculate monthly family expenses. ServiceNow, being a powerful cloud-based platform, offers custom application development that can be leveraged for personal finance tracking.

OBJECTIVE:

- To build a Family Expense Management System using ServiceNow that allows users to:
- Enter daily or monthly expenses under different categories (e.g., groceries, rent, transport, education, etc.)
- View summary reports of total and category-wise expenses
- Set monthly budgets and receive alerts if spending exceeds limits
- Generate downloadable reports for any time period

SKILL:

1. ServiceNow Application Development

- Creating custom tables
- Designing forms and views
- Using Flow Designer for automation

2. Workflow & Automation

- Using ServiceNow Flow Designer to automate calculations and notifications

3. Database Management

- Creating and managing custom tables for storing expenses and budgets

4. Reporting & Dashboard Design

- Designing ServiceNow reports
- Building graphical dashboards for data visualization

TASK INITIATION:

MILESTONE 1: Setting up ServiceNow Instance

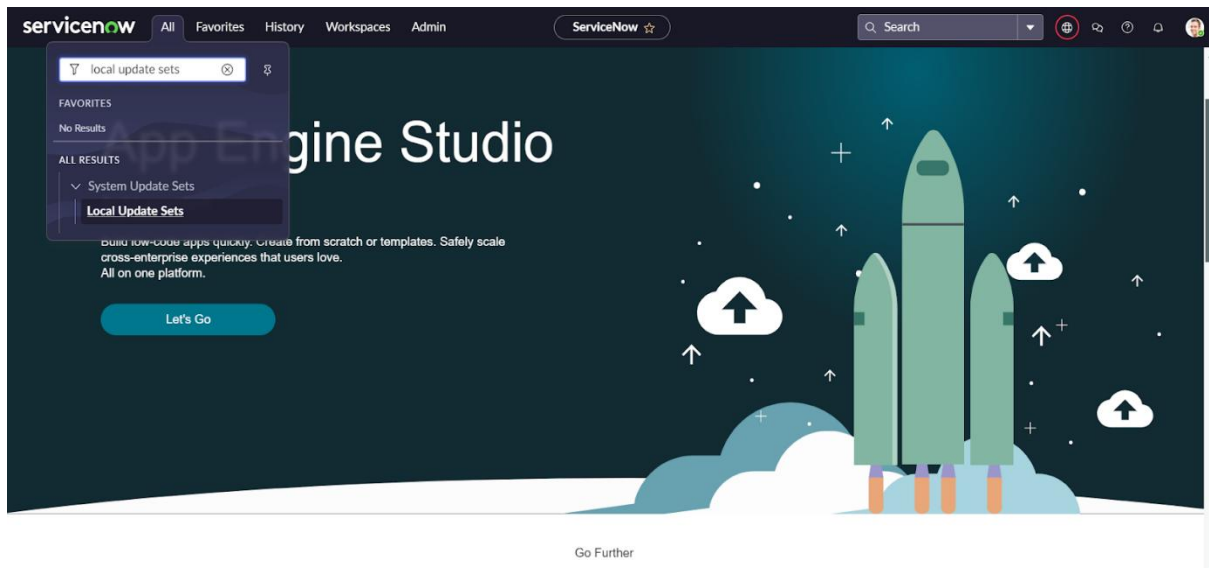

ACTIVITY 1: Setting up ServiceNow Instance

1. Sign up for a developer account on the ServiceNow Developer site
“<https://developer.servicenow.com>”.
2. Once logged in, navigate to the "Personal Developer Instance" section.
3. Click on "Request Instance" to create a new ServiceNow instance.
4. Fill out the required information and submit the request.
5. You'll receive an email with the instance details once it's ready.
6. Log in to your ServiceNow instance using the provided credentials.
7. Now you will navigate to the ServiceNow.

MILESTONE 2: Creation of New Update Set

ACTIVITY 1: Creation of New Update Set

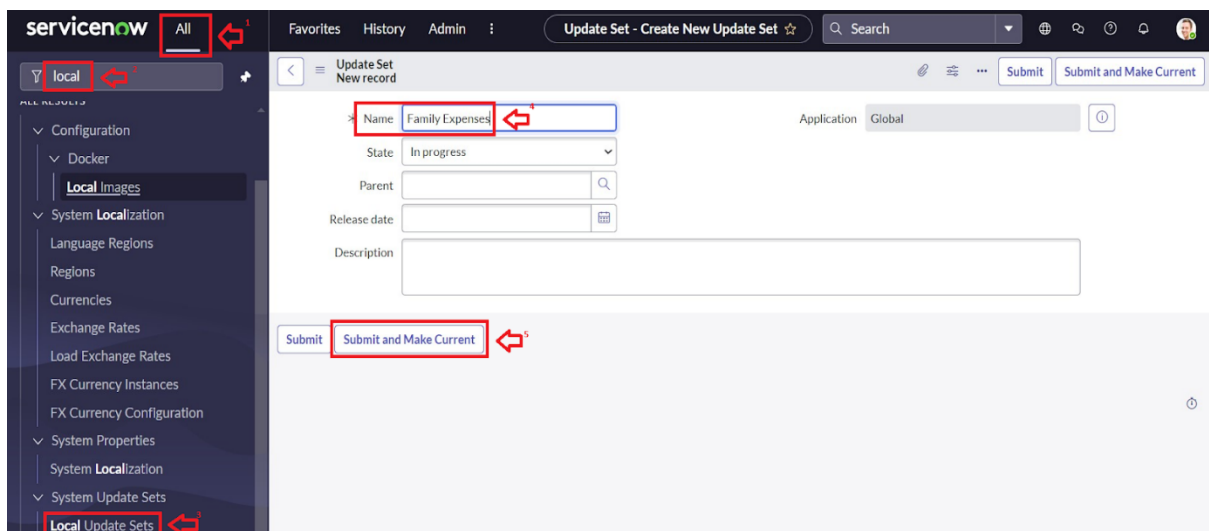

1. Go to All >> In the filter search for Local Update set > click on New.

2. Enter the Details as:

Name: Family Expenses

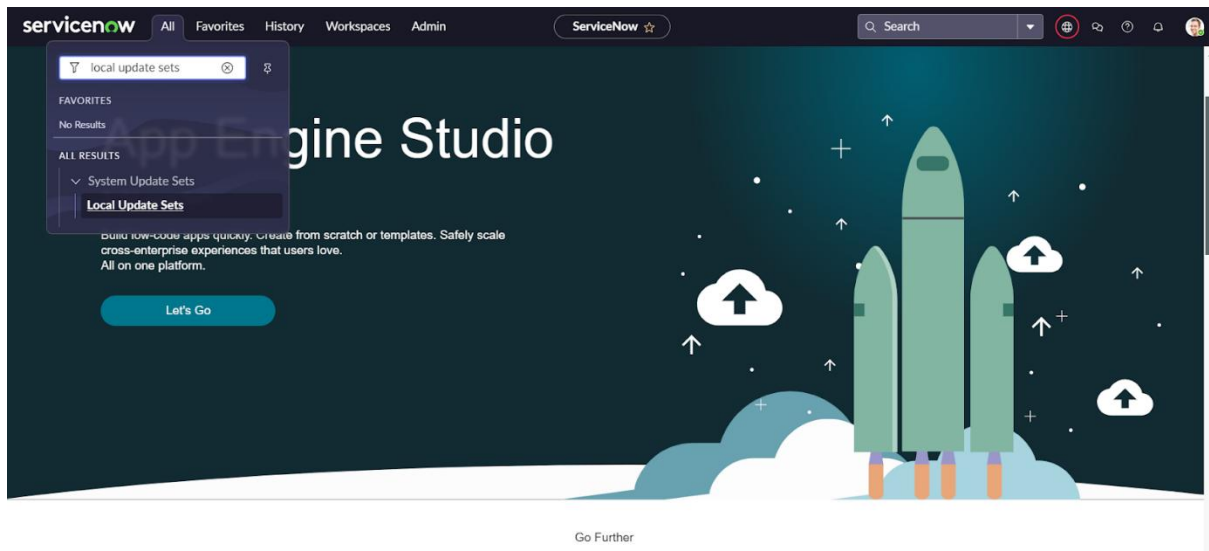

3. Then click on Submit and Make current.

MILESTONE 3: Creation of Table

ACTIVITY 1: Creation of New Update Set

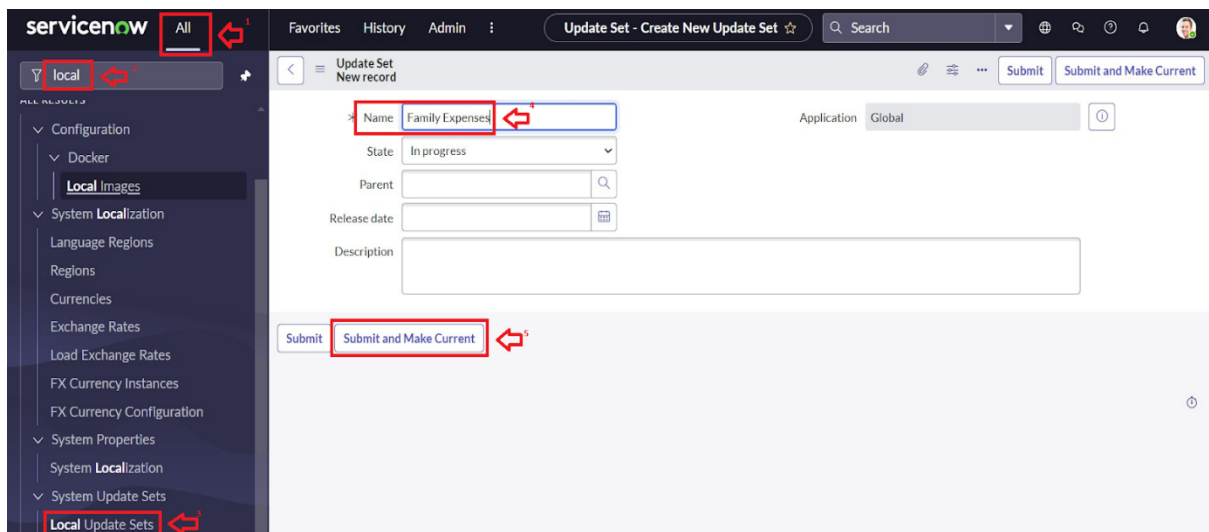

1. Go to All >> In the filter search for Local Update set > click on New.

2. Enter the Details as:

Name: Family Expenses

3. Then click on Submit and Make current.

MILESTONE 4: Creation of Table

ACTIVITY 1: Creation of Family Expenses Table

1. Go to All > In the filter search for Tables > click on New.

2. Enter the Details:

Label: Family Expenses

Name: Auto-Populated

New menu name: Family Expenditure

The screenshot shows a configuration interface with two main sections. The top section contains form fields for 'Label' (Family Expenses), 'Name' (u_st_family_expenses), 'Application' (Global), 'Remote Table' (checked), 'Create module' (checked), 'Create mobile module' (checked), 'Add module to menu' (dropdown), and 'New menu name' (Family Expenditure). The bottom section is titled 'Columns' and contains a table with the following data:

	Column label	Type	Reference	Max length	Default value	Display
✕ ✎	Number	String				false
✕ ✎	Date	Date				false
✕ ✎	Amount	Integer				false

3. Go to the Header and right click there >> click on Save.

ACTIVITY 2: Creation of Columns (Fields)

1. Near Columns Double click near insert a new row.

2. Give the details as:

Column label: Number

Type: String

3. Double clicks on insert a new row again

4. Give the details as:

Column label: Date

Type: Date

5. Double clicks on insert a new row again

6. Give the details as:

Column label: Amount

Type: Integer

7. Double clicks on insert a new row again

8. Give the details as:

Column label: Expense Details

Type: String

Max length: 800

9. Go to the Header and right click there>> click on Save.

ACTIVITY 3: Making Number Field an Auto-Number

1. Double click on the Number Field/Column.

2. Go down and double click on Advanced view

3. In Default Value:

Use dynamic default: check the box

Dynamic default value: Get Next Padded Number

4. Click on Update.

Choice List Specification | Calculated Value | **Default Value**

The **Default value** specifies what value the field has when first displayed.

Use dynamic default: ☒ **Dynamic default value:** Get Next Padded Number

Delete Column | **Update**

5. Go to All >> In the filter search for Number Maintenance >> select Number Maintenance

6. Click on New.

7. Enter the below Details:

Table: Family Expenses

Prefix: MFE

< | Number MFE | Update | Delete

* Table: Family Expenses

Prefix: MFE

* Number: 1,000

Application: Global

Number of digits: 7

Update | Delete

9. Click on Submit.

ACTIVITY 4: Configure the Form

1. Go to All >> In the filter search for Family Expenses >> Open Family Expenses
2. Click on New
3. Go to the Header and right click there>> click on Configure >> Select Form Design
4. Customize or Drag Drop the form as per your requirement.

The screenshot shows the configuration interface for the 'Family Expenses [u_family_expenses]' form. The top section is titled 'Family Expenses [u_family_expenses]' and has a '2 Column' dropdown. Below this, there are three input fields: 'Number', 'Date', and 'Amount'. Each field has a gear icon for configuration and a close icon. The bottom section is titled 'Expense Details' and has a '1 Column' dropdown. It contains a single input field for 'Expense Details' with a gear icon and a close icon.

5. Make Number Read-Only Field by clicking on the gear icon and checking Read-Only
6. Make Date, Amount Mandatory Field by clicking on the gear icon and checking Mandatory
7. Click on Save.

MILESTONE 5: Creation of Table (Daily Expenses)

ACTIVITY 1: Creation of Daily Expenses Table

1. Go to All > In the filter search for Tables > click on New.
2. Enter the Details:

Label: Daily Expenses

Name: Auto-Populated

Add Module to menu: Family Expenditure

The screenshot shows a configuration interface for a module. On the left, there are two input fields: 'Label' with the value 'Daily Expenses' and 'Name' with the value 'u_daily_expenses'. Both fields are highlighted with a red box and a red double-headed arrow with a small '1' and '2' respectively. Below these is an 'Extends table' field. On the right, there is a section for 'Application' set to 'Global'. Below that, 'Create module' and 'Create mobile module' are both checked. A button labeled 'Application Menu' is visible. At the bottom, there is a dropdown menu labeled 'Add module to menu' with the value 'Family Expenditure' selected, highlighted with a red box and a red double-headed arrow with a small '3'.

3.Go to the Header and right click there>> click on Save.

ACTIVIT 2: Creation of Columns (Fields)

1. Near Columns Double click near insert a new row.

2. Give the details as:

Column label: Number

Type: String

3.Double clicks on insert a new row again

4.Give the details as:

Column label: Date

Type: Date

5.Double clicks on insert a new row again

6.Give the details as:

Column label: Expense

Type: Integer

7. Double click on insert a new row again

8. Give the details as:

Column label: Family Member Name

Type: Reference

Max length: 800

9. Double clicks on insert a new row again

10. Give the details as:

Column label: Comments

Type: String

Max length: 800

11. Go to the Header and right click there >> click on Save.

ACTIVITY 3: Making Number Field an Auto-Number

1. Double clicks on the Number Field/Column.

2. Go down and double click on Advanced view

3. In Default Value:

Use dynamic default: check the box

Dynamic default value: Get Next Padded Number

4. Click on Update.

Choice List Specification | Calculated Value | **Default Value**

The **Default value** specifies what value the field has when first displayed.

Use dynamic default: ☒

Dynamic default value: Get Next Padded Number

Delete Column | Update

5.Go to All >> In the filter search for Number Maintenance
>> select Number Maintenance

6.Click on New.

7.Enter the below Details:

Table: Family Expenses

Prefix: MFE

< ≡ Number New record [Submit]

* Table: Daily Expenses

Prefix: DFE

* Number: 1,000

Application: Global

Number of digits: 7

[Submit]

9.Click on Submit.

ACTIVITY 4: Configure the Form

1. Go to All >> In the filter search for Daily Expenses >> Open Daily Expenses
2. Click on New
3. Go to the Header and right click there>> click on Configure >> Select Form Design
4. Customize or Drag Drop the form as per your requirement.

The screenshot shows a form configuration window for 'Daily Expenses [u_daily_expenses]'. The form is configured with a '2 Column' layout. The fields are arranged as follows:

Field	Configuration Icon
Number	Gear icon
Date	Gear icon
Family Member Name	Gear icon
Expense	Gear icon

Below the main form, there is a 'Comments' section with a '1 Column' layout, also featuring a gear icon for configuration.

5. Make Number Read-Only Field by clicking on the gear icon and checking Read-Only
6. Make Date, Family Member Name Mandatory Field by clicking on the gear icon and checking Mandatory
7. Click on Save.

MILESTONE 6: Creation of Relationship

ACTIVITY 1: Creation of Relationship between Family Expenses and Daily Expenses table

1. Go to All >> In the filter search for Relationships >> Open Relationships

2. Click on New.

3. Enter the details:

Name : Daily Expenses

Applies to table : Select Family Expenses

Daily Expenses : Select Daily Expenses

4. Click Save.

MILESTONE 7: Configuring Related List on Family Expenses

1. Go to All >> In the filter search for Family Expenses
>> Open Family Expenses

2. Click on New

3. Go to the Header and right click there>> click on
Configure >> Select Related Lists

4. Add Daily Expenses to the Selected Area.

5. Click on Save

MILESTONE 8: Creation of Business Rules

1. Go to All >> In the filter search for Business Rules.
2. Under System Definition Select Business Rules then click on New.
3. Enter the Details:

Name : Family Expenses BR

Table : Select Daily Expenses Check Advanced

4. In when to run Check Insert and Update

When to run **1** Advanced

Specify whether the business rule should run on Insert or Update. Use Filter Conditions to specify under which conditions

When: before
Order: 100

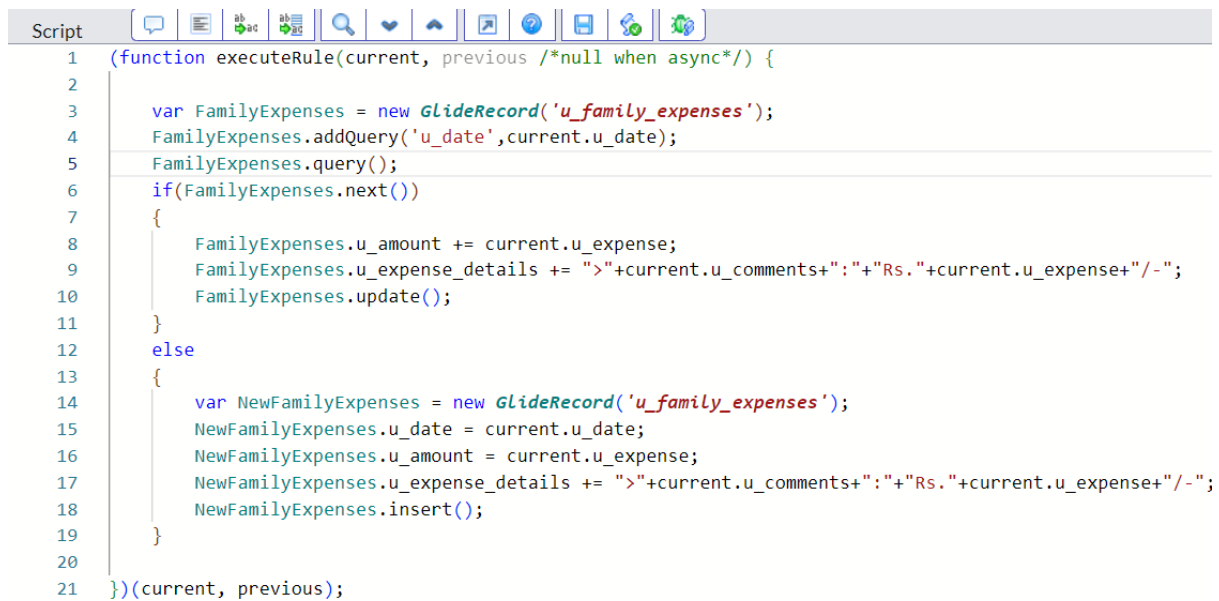

Filter Conditions: [Add Filter Condition](#) [Add "OR" Clause](#)
-- choose field -- -- oper -- -- value --

Role conditions: [Edit](#)

Insert ☒
Update ☒

Query ☐

5. In Advance(we write the code): Write the below code

```
(function executeRule(current, previous /*null when async*/) {
  var FamilyExpenses = new GlideRecord('u_family_expenses');
  FamilyExpenses.addQuery('u_date',current.u_date);
  FamilyExpenses.query();
  if(FamilyExpenses.next())
  {
    FamilyExpenses.u_amount += current.u_expense;
    FamilyExpenses.u_expense_details +=
    ">" + current.u_comments + ":" + "Rs." + current.u_expense + "/"
    -";
    FamilyExpenses.update();
  }
  else
  {
    var NewFamilyExpenses = new
    GlideRecord('u_family_expenses');
    NewFamilyExpenses.u_date = current.u_date;
    NewFamilyExpenses.u_amount = current.u_expense;
    NewFamilyExpenses.u_expense_details +=
    ">" + current.u_comments + ":" + "Rs." + current.u_expense + "/"
    -";
    NewFamilyExpenses.insert();}
})(current, previous);
```

```

1 (function executeRule(current, previous /*null when async*/) {
2
3     var FamilyExpenses = new GlideRecord('u_family_expenses');
4     FamilyExpenses.addQuery('u_date', current.u_date);
5     FamilyExpenses.query();
6     if(FamilyExpenses.next())
7     {
8         FamilyExpenses.u_amount += current.u_expense;
9         FamilyExpenses.u_expense_details += ">" + current.u_comments + ":" + "Rs." + current.u_expense + "/-";
10        FamilyExpenses.update();
11    }
12    else
13    {
14        var NewFamilyExpenses = new GlideRecord('u_family_expenses');
15        NewFamilyExpenses.u_date = current.u_date;
16        NewFamilyExpenses.u_amount = current.u_expense;
17        NewFamilyExpenses.u_expense_details += ">" + current.u_comments + ":" + "Rs." + current.u_expense + "/-";
18        NewFamilyExpenses.insert();
19    }
20
21 }(current, previous);

```

MILESTONE 9: Configure the Relationship

1. Go to All >> In the filter search for Relationships >> Open Relationships.
2. In that, open Daily Expenses Relationship.
3. For Applies to table : Select Family Expenses.
4. In Query with : write the below Query.

```

(function refineQuery(current, parent) {
// Add your code here, such as current.addQuery(field, value);
current.addQuery('u_date', parent.u_date);
current.query();
})(current, parent);

```

5. Click on Update.

Conclusion:

The Family Expense Calculation System on ServiceNow offers an easy and efficient way to manage household finances. With features like expense tracking, budget setting, and reporting, it helps users monitor spending and make informed financial decisions. The system's scalability and user-friendly interface ensure it supports families of all sizes, promoting better financial planning and control.
